LETTER FROM LEADERSHIP

As I reflect on 2025, I am proud of the momentum and impact AOSSM continues to achieve on behalf of our members, our patients, and the field of sports medicine.

This year marked an important moment of transition as we announced the planned retirement of our longtime CEO, Greg Dummer. Greg's steady leadership and deep commitment to AOSSM have shaped the Society in lasting ways. We are grateful for his service and look forward to announcing our next CEO in 2026 as we build on this strong foundation.

AOSSM advanced its mission globally through the launch of our second BOLD cohort and the continued success of our traveling fellowships with APKASS, SLARD, and ESSKA—strengthening international collaboration and professional development. We also convened leaders from the Professional Sports Physicians Coalition, AOSSM, AMSSM, and the NCAA. This meeting addressed critical issues regarding athlete health and safety, as well as the legal protection of the physicians providing their care.

Our commitment to research reached new heights with the Arthritis Foundation as we jointly awarded a landmark $500,000 grant to transform shoulder osteoarthritis research. In addition, the *Video Journal of Sports Medicine* achieved a major milestone by passing evaluation for PubMed Central indexing.

Finally, we launched Catalyst™, an innovative research mentorship program led with AANA and SOMOS, designed to equip early career clinicians with the tools, mentorship, and collaboration needed to advance meaningful research.

These accomplishments reflect the strength of our community and the shared dedication to excellence that defines AOSSM. I am grateful to our members, partners, and volunteers for making 2025 a year of progress and promise.

With gratitude,

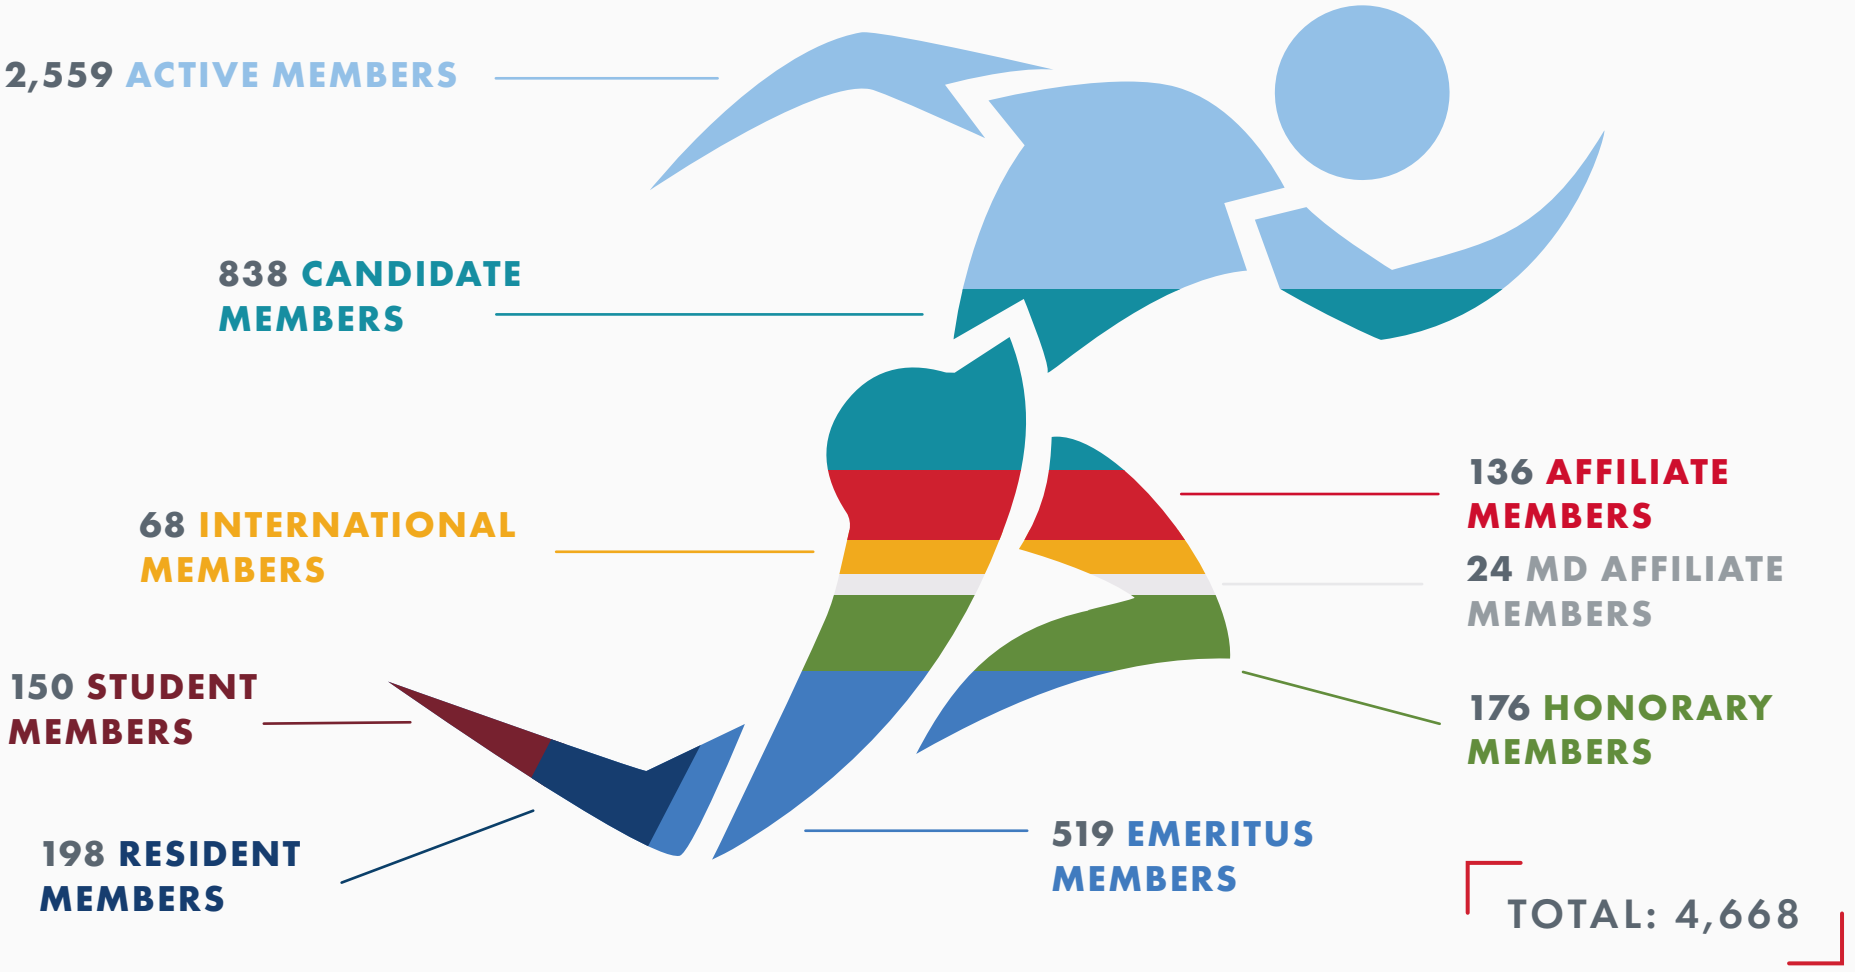

Eric C. McCarty, MD
AOSSM President 2025-2026

MEMBERSHIP:
THE VALUE FOR YOU

In 2025, AOSSM Membership reached a new record, with increases in new applications, member referrals, and early career retention. The Society also welcomed medical student members for the first time and expanded its global reach through partnerships with researchers, allied health professionals, and international surgeons. 2026 will bring a new career center, an expanded mentorship program, and more access to the AOSSM family of journals. Learn more about your valuable member benefits at sportsmed.org/membership.

FELLOWS COURSE:

The 10th Annual AOSSM Fellows Course was held July 25-26, 2025, at the OLC Education & Conference Center in Rosemont, Illinois. Led by Co-Chairs Katherine Coyner, MD, MBA, Kristofer Jones, MD, Craig Mauro, MD, and Jonathan Riboh, MD, the course welcomed 120 incoming fellows for two days of immersive education focused on sideline care, training room management, and real-world practice readiness.

BOLD: BOOSTING ORTHOPAEDIC LEADERS' DEVELOPMENT

LEADERSHIP IN ACTION: COHORT 1 GRADUATES

In 2025, AOSSM proudly celebrated the graduation of the inaugural BOLD 1 Cohort. After a transformative two-year journey of high-impact programming, individual coaching, and peer collaboration, the Playmakers culminated their experience by presenting their group projects during a concurrent session at the AOSSM Annual Meeting in Nashville.

Designed to build confidence, leadership capacity, and meaningful engagement within the Society, BOLD has already demonstrated measurable impact. From pre-program benchmarks to final survey results, participants reported substantial gains across critical leadership competencies.

BOLD Final Survey Fall 2025:

INCREASED CONFIDENCE IN
LEADERSHIP ABILITY

INCREASED CONFIDENCE
COMMUNICATING EFFECTIVELY
AT WORK

INCREASED ABILITY TO
BUILD A STRATEGIC NETWORK

INCREASED STRENGTH OF
PERSONAL BRAND

INCREASED ABILITY TO LEVERAGE
PERSONAL BRAND & SOCIAL MEDIA PRESENCE

Overall program ratings reflected extraordinary satisfaction, with participants rating **BOLD 9.8/10** and reporting a **100 Net Promoter Score**, indicating every participant would recommend the program to a colleague.

INVESTING IN THE FUTURE OF THE SPECIALTY

BOLD represents AOSSM's strategic investment in leadership development–recognizing that advancing sports medicine requires not only scientific excellence, but also empowered, confident, and connected surgeons prepared to lead.

This initiative would not be possible without the generous support of **Enovis and Zimmer Biomet**, whose partnership reflects a shared commitment to innovation, mentorship, and the future of orthopaedic sports medicine.

Building on the success of Cohort 1, **BOLD 2 launched in July 2025**, welcoming 18 new Playmakers into the two-year experience. With continued enhancements–including expanded in-person engagement, structured project mentorship, and an emerging alumni component–BOLD continues to evolve as a flagship leadership development program within AOSSM.

Together, we are not only preparing individual surgeons for leadership, but we are also shaping the future of the specialty.

I choose to ... support AOSSM because of all that it does to support everything that we do as team physicians. It is the education, the administration, the fellowships, the content, the advocacy .... Everything about being a team physician comes to us through AOSSM and it's the organization that supports us the best.

– Jeffrey R. Dugas, MD

RESEARCH: **THE NEED FOR INNOVATION**

In 2025, AOSSM awarded nearly $750,000 in new research grants and awards, supporting continued innovation in orthopaedic sports medicine.

- 2025 Bart Mann Award Winner: Jacob J. Capin, PT, DPT, PhD, MS (Marquette University)
- 2025 Orthopaedic Research Society's Clinician Scholar Career Development Program: Jayson Lian, MD (Cedars Sinai Kerlan Jobe Institute)

Major Grants and Award Highlights: 2025 Research Award Winners

Excellence in Research Award:
A Randomized Controlled Trial of Postoperative Hip Bracing After Arthroscopic Osteoplasty and Labral Repair for Femoroacetabular Impingement Syndrome

Lead Author: Mia S. Hagen, MD
Co-Authors: Eric Meier, MS, Carrie Wigton, MA, Michelle Son, MD, Christopher Y. Kweon, MD

O'Donoghue Sports Injury Research Award:
Risk of Revision and Reoperation After ACL Reconstruction. Comparison of Quadriceps Tendon, Patellar Tendon, and Hamstring Autografts Stratified by Patient Gender and Age: A Cohort Study of 27,715 Patients

Lead Author: Gregory B. Maletis, MD
Co-Authors: Christopher R. Lehman, MD, Heather A. Prentice, PhD, Chelsea Reyes; Colin Mansfield, MD, Justin S. Yang, MD

Cabaud Memorial Award
Posterolateral Tibial Bone Loss in the Setting of ACL Insufficiency Leads to Increased Anterior Tibial Translation, Internal Rotation, and Knee Valgus During a Simulated Pivot Shift Which Was Normalized with a Combined ACL Reconstruction and Lateral Extraarticular Tenodesis But Not an ACL Reconstruction Alone.

Lead Author: David Bernholt, MD
Co-Authors: Luke V. Tollefson, BS, Mitchell R. Carlson, MS, Erik L. Slette, MD, Grant J. Dornan, MS, Evan P. Shoemaker, BA, Frederick M. Azar, MD, Garrett G. Eggleston, MS, Jewel A. Stone, BS, BA, Bergin M. Brown, BS, Robert F. LaPrade, MD, PhD

2025 AOSSM Research Grant Winners:

Steven P. Arnoczky Young Investigator Grant:
- Clinical Science: Morgan Angotti, MD, Rush University Medical Center, *"Multidisciplinary Approach to Understanding Anterior Knee Pain"*
- Basic Science: Ting Cong, MD, University of Pittsburgh, *"Towards Individualized Glenoid Track Assessment for Shoulder Instability"*

Sandy Kirkley Clinical Outcomes Research Grant:
- David Bernholt, MD, University of Tennessee Campbell Clinic, *"Extended Post-Operative Oral TXA After ACLR: A Multicenter RCT"*

JRF Ortho Allograft Grant:
- Paula Hernandez, PhD, The University of Texas Southwestern Medical Center, *"Understanding OCA Structure and Matrix Nanomechanics to Improve Integration"*

Many of us have our first view of AOSSM when we come as medical students. What I think is most impactful is when I am here I see people of diversity representing the field. That is so impactful for allowing us to continue to encourage a diverse population of the medical field to enter the sports medicine subspecialty.

- Sommer Hammoud, MD

Obtaining the Playmaker Grant ... allowed our team to catapult some of the research we're doing.

– Seth L. Sherman, MD

2025 AOSSM Research Grant Winners:

Playmaker Grant Lab:

- Jonathan Hughes, MD, University of Pittsburgh: *"Dislocation- and Surgery-Induced Plasticity of the Glenoid Track"*
- Michael Freehill, MD, Stanford University, and Bradley Austin Lezak, MD, NYU Langone Orthopedics: *"Valgus Force on the UCL During Batter's Swing and Hitting Motion"*
- Estephania Nunez, DAT, University of Minnesota-Duluth: *"Virtual Reality as a Prevention Tool for Anterior Cruciate Ligament Injury"*

AOSSM-Arthritis Foundation Shoulder Osteoarthritis Grant:

- Michael Davies, MD, University of California, San Francisco (UCSF), Brian Feely, MD, UCSF, and Robert Tashjian, MD, University of Utah: *"Defining the Molecular Signature of Glenohumeral Osteoarthritis Using a Multi-Omic Approach"*

Military Advanced Surgical Training (MAST) Grant:

- Jason Dragoo, MD, University of Colorado Anschutz School of Medicine: *"A Multi-Center Biologics Association Registry and Biorepository of Platelet-Rich Plasma for the Treatment of Symptomatic Knee Osteoarthritis Among Civilian and Military Populations"*
- Michael Banffy, MD, Cedars-Sinai: *"Bioinductive Collagen Implant Augmentation in Hip Arthroscopy: A Randomized Controlled Trial Evaluating Enhanced Recovery in Military and Athletic Populations"*

Research Activities During 2025

Continued Collaboration with the Arthritis Foundation
2025 Think Tank: Clinical Research Gaps in the Prevention and Treatment of Hip Osteoarthritis

This Think Tank convened experts to examine strategies for hip preservation and the prevention of hip osteoarthritis (OA), including conditions such as hip dysplasia and femoroacetabular impingement. Discussions also addressed early diagnosis, joint capsule management, and approaches to identifying populations at risk for rapidly progressive disease.

- Summary document: In development
- Hip OA Grant RFA: $750,000 funding opportunity released March 1, 2026

Collaboration with ESSKA & ASPTA

- International Consensus Statements
  Currently developing a statement on ACL injury rehabilitation, titled: The Formal EU-US ACL Rehabilitation Consensus: An ESSKA-AOSSM-AASPT Initiative.

Collaborative Research Mentoring Programs

Arthrex, AOSSM, and the Japan Sports Orthopaedic Association (JSOA) International Research Fellowship

This new competitive program selected two Japanese scholars for a 12–18-month mentored research fellowship at US institutions. Fellows will conduct research, present at the AOSSM Annual Meeting, and visit the Arthrex headquarters in Naples, Florida. Each receives $37,500 to support travel, visa, salary, and publication costs.

- 2025 Fellows: Tomoya Ono, MD (University of Pittsburgh) and Shuhei Iwata, MD, PhD (University of Minnesota)
- Fellowships begin: Early 2026

AOSSM has been my home as a professional. It has given me the tools and the community to help me succeed as a surgeon, as an educator, as a team physician. And my goals are that this carries on to the next generation. I want this to be available to allow others to have the same type of experience that I do, and to have the home that I do. I want members to consider what AOSSM has meant to them and, if it is meaningful, I suggest putting something back.

- Eric McCarty, MD

"CATALYST" LONGITUDINAL RESEARCH MENTORSHIP PROGRAM

Catalyst™ is a first-of-its-kind research mentorship program designed to develop the next generation of sports medicine clinician-scholars through longitudinal training, online learning, mentorship from senior research leaders, and in-person meetings. With generous support from the Geneva Foundation and the Orthopaedic Research Society, the inaugural cohort began an 18-month program in July 2025.

- 2025 Cohort: Jonathan Hughes, MD (University of Pittsburgh, AOSSM) Eric Cotter, MD (University of Wisconsin Madison, AANA), and Daniel Cognetti, MD (Brooke Army Medical Center, SOMOS)
- 2025 Senior Scientist Mentor: Travis Maak, MD (University of Utah)

aossm™ American Orthopaedic Society for Sports Medicine

SOMOS Society of Military Orthopaedic Surgeons

AANA ADVANCING THE SCOPE™

2025 AOSSM Research Workshop:
Top Strategies for Starting and Refining Your Research Program

This highly attended workshop at the AOSSM Annual Meeting in Nashville focused on developing and strengthening research programs for early and mid-career professionals across diverse practice settings. Panel and small-group discussions with experienced member scientists addressed team development, research infrastructure, outcomes selection, funding strategies, and pathways to get involved in research.

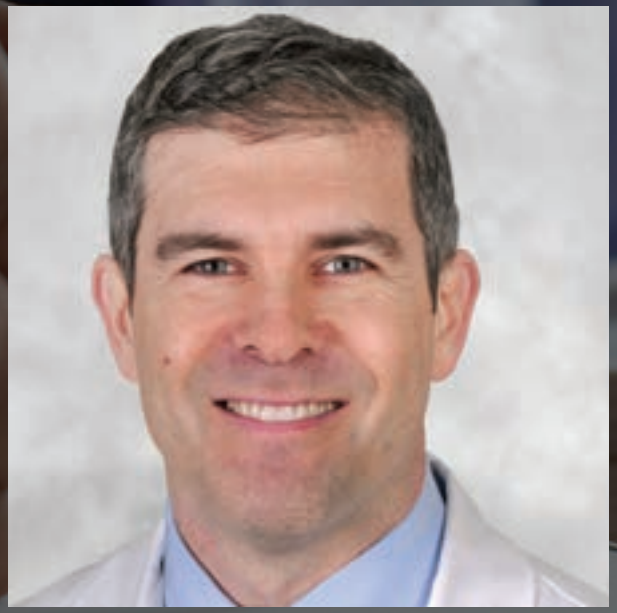

AOSSM has been a huge advocate of high-level, multicenter research. The funding of research through AOSSM creates a tremendous legacy of advancing the care of our athletes. We are able to improve the evidence that helps us improve the care of our patients and drive our field forward for years to come.

- Jeffrey J. Nepple, MD, MS

PUBLISHING & JOURNALS:
THE STRATEGIES FOR SUCCESSFUL PUBLISHING

2025 included major updates in the publishing program. The submission sites for all journals transitioned to the more widely used ScholarOne system, allowing integration with the production workflow with our publisher, SAGE. This change allows for a shorter time from acceptance to publication and gives the editors more control over the peer review process. It also facilitates transfers of papers between journals, keeping more quality papers in our journals while enhancing the author experience.

AOSSM started a new partnership with SAGE to create a joint publishing team integrating key personnel from the AOSSM publishing office and SAGE editorial. This partnership will allow for a closer business and development relationship between AOSSM publishing and SAGE.

In 2025, Brett Owens, MD assumed the role of Editor in Chief of *The American Journal of Sports Medicine*. He succeeded Bruce Reider, MD, as the fourth person to hold the title in the journal's 53 years.

PHILANTHROPY IN ACTION:
THE COMMITMENT TO THE FUTURE

Philanthropy plays a vital role in advancing AOSSM's mission to improve patient care through education, research, and innovation. Donor support provides the flexible resources needed to invest in emerging areas of sports medicine, support early career surgeons, and maintain excellence in scientific discovery and professional education.

Your generosity is making sports medicine stronger—for today's patients and tomorrow's leaders. In 2025, donor gifts exceeded $327,000, supporting scholarships, education, and cutting-edge research.

AOSSM holds the Candid/GuideStar Platinum Seal of Transparency. AOSSM is registered with Candid/GuideStar, an organization that collects information about the social sector. Since 2022, AOSSM has held the Platinum Seal of Transparency, the leading symbol of nonprofit transparency and accountability, by providing evidence that the Society is dedicated to transparency, fiscal responsibility, and DEI initiatives. Fewer than one percent (0.75%) of nonprofits registered with Candid/GuideStar achieve this recognition. The seal demonstrates AOSSM's commitment to providing current and prospective donors with meaningful data with which to evaluate our organization's performance to our mission.

Platinum Transparency 2025

Candid.

PARTNERS IN PROGRESS:
INDUSTRY SUPPORT MAKING A DIFFERENCE

Corporate and Grant Funding

AOSSM's progress wouldn't be possible without our industry partners. In 2025, more than 62% of our Annual Meeting revenue came from companies that share our vision for innovation, education, and improved patient care. Organizations also generously provide sponsorship and grant funding for educational activities and research.
